

CEREC ASSISTANT CERTIFICATION SERIES

Presented by AZ CAD/CAM

This is designed to certify dental assistants in the following 3 levels of competencies.

Basic Certification: Basic scan and design techniques, basic glaze and polishing techniques and maintenance of the CEREC machine.

Intermediate Certification: Biogeneric Copy and Copy and Mirror design modes, quadrant dentistry and bridge design, custom stain/glaze for posterior restorations.

Advanced Certification: Fabricate screw-retained restorations as well as cement-retained restorations and export an STL file to print 3D models.

Each dental assistant will receive a certification certificate upon completion of each course.
