# Learning objectives:

- › See how 3D helps enhance patient communication for a better understanding of the issue and treatment plan, leading to increased treatment acceptance
- › Understand the role of medical billing in the dental practice and dental/medical cross-coding to optimize insurance benefits
- › Observe and understand the patented 3D Infusion “Power Block” Workflow
- › Experience CEREC® CAD/CAM hands-on, from digital impression to custom abutment fabrication
- › How to add more practice-building procedures into your repertoire, including implants and sleep apnea diagnosis and treatment
- › Learn how 3D CBCT and Digital Dentistry positively impact practice revenue
- › Realize the benefits of improved diagnostic capabilities made possible by 3D CBCT imaging

Lead course educator:  
**Dr. Sam Bollwinkel**

**3D** Infusion

**Samuel Bollwinkel DDS**, is the creator and founder of 3D Infusion where he concentrates on bridging the gap between innovation and application. He has over 18 years of private practice experience and thrives on the successful integration of CBCT and CEREC technology.

*Other guest speakers featured throughout the 2-day event include Robert Timothy, DDS; Greg Manning, DDS; and Doug Fettig, CPA.*

Schedule and speakers subject to change.

**November 15th - 16th**
