

KATANA™ Zirconia Workflow:

From single posterior to more advanced esthetic applications

COURSE SUMMARY

Zirconia is by far the most popular material used in dentistry today. Dental companies are launching zirconia blocks to meet this demand in the CAD/CAM world, but it turns out that not all zirconia materials are the same. This course will highlight the differences of what makes Katana Zirconia unique. We will discuss different applications from the single molar restorations, to bridges, and in the anterior as well. We will also look at when to polish, when to characterize, and how to bond zirconia restorations. Come join us for a fun evening learning pearls from a long time CEREC® user with an obvious passion for dentistry.

COURSE LEARNING OBJECTIVES

- Become proficient using Katana Zirconia from start to finish for single unit restorations.
- Learn advanced applications for Katana Zirconia such as bridges and anterior restorations.
- Discover bonding techniques for zirconia and immediate dentin sealing.

SPEAKER Dr. Kristine Aadland has an energy and excitement for life that is seen by all who have met her. Raised in Vancouver, Washington, Dr. Aadland attended dental school at Oregon Health & Sciences University, and graduated in 2006 with Clinical Honors. After associating for a few years, she then built out her dream practice in 2009. Dr Aadland chose to differentiate herself in a competitive market by utilizing the best technology available for greater efficiency and patient comfort. The cornerstone of this technology was Sirona's CEREC® and Galileos products. This choice has paid off as Dr Aadland's practice has continued to realize remarkable growth each year.

Dr. Aadland's success is not by accident. She is constantly pushing the limits of CEREC® technology with bridges, implants, orthodontics and her same day smile makeovers. This has all been made possible by the extensive continuing education that she does each year. As a Mentor for CEREC® doctors, the forum and Scottsdale facility have also created a place for her to grow and refine her skills. Dr. Aadland travels now for CEREC® trainings, ACCEPT courses and began speaking in 2016. Her passion and energy for CEREC® is contagious.
